

DRESSER MIRROR ATTACHMENT INSTRUCTIONS

Carolina mirrors add depth and style to your bedroom while providing convenience to your dressing area. Mirrors are available to match dressers in each bedroom series. Two wooden supports are pre-attached to the backs of each mirror with holes that are pre-drilled for installation to a dresser base. In addition, mounting screws are pre-packaged and placed in the top drawer of each dresser to be used for mounting a matching mirror. Framed mirrors are available in a variety of styles from Carolina that complement colors and textures of each bedroom series.

Things You Will Need

- Tape measure
- Pencil
- Pre-attached wooden mirror supports
- Screwdriver
- Pre-packaged wood screws
- Two people are recommended

Remove mirror from the box and turn the pre-attached mirror supports to the complete down position. You may use a bed or soft surface in this step while positioning the mirror supports. With help, move dresser within the room to allow work space behind and in front of dresser prior to mirror installation.

Using the tape measure, you may either measure the distance from each side of the mirror and dresser to reach a center point, or visually center the mirror to the dresser as desired. If measuring for a center point, measure and mark the center point of dresser and mirror on the back side of each (top center of dresser) (bottom center of mirror – between wooden brackets).

Lift mirror to an upright position and place it at the rear of your dresser with the mirror supports left to swing in the down position. ****Note:** At this point two hands are better; one to hold mirror in place and one to secure the mirror with screws and wood brackets.

With the mirror in the center position (matching pencil marks), insert screws supplied into the pre-drilled holes of the wooden mirror supports and screw into back of dresser, first one on each side of the dresser, then repeat until each side is secured. If using power equipment be careful not to over tighten screws.

Note: After installation, be careful moving the dresser into place, and anytime dresser is moved it is advisable to first remove the mirror, and remember two hands are better than one when installing or moving mirrors or dressers.

Note: If you purchased a mirror to use separately, to wall hang, etc., or for use with another manufactured product or piece other than a Carolina Dresser Base, we suggest that you purchase mirror mounting hardware from a local supplier and follow recommended instructions that come with the mounting kit to fit the type of installation you desire.
